## Programming

Java

JavaScript

PHP

C++

Objective-C

MySQL

Python

## Libraries & Frameworks

Angular

Express

NodeJS

React

## Operating Systems

Mac OS

Windows

Linux Ubuntu

## Foreign Language

Cantonese

## Projects

### QTI Website Redesign

**Summer 2016**

- Redesigned Quarterhorse Technology's website making it viewport responsive and adaptive.

### Handball Scorekeeper Web App

**June 2016**

- Implemented a web app that helps keep track of handball scores using HTML, CSS, and jQuery.

### Digital Conceptions

**Spring 2016**

- Worked with a team of 3 to create a website to read and create comics using JSP, JavaScript, Java, and Google App Engine.

### Steven Stocks

**Spring 2016**

- Collaborated with 2 others to implement a web application designed to simulate a stock trading system using JSP, JavaScript, Java, and MySQL.

## Experience

### **Contract Front End Developer**

**Nov 2016**

*Hatch Inc*

- Transition the Hatch app to Angular.

### **Front End Software Engineer Intern**

**Aug 2016**

*Neene Inc*

- Design and implement elegant prototype pages with considerations of user experience.
- Build pages with HTML, CSS, JavaScript, and the support of the Java backend querying from MySQL database.

### **Library IT Student Assistant**

**Feb 2015 - July 2016**

*Stony Brook University*

- Synchronized embedded Twitter feed with Totem Ticker JQuery plugin for digital signage.
- Set up computers for new workers, and troubleshoot computers and networks.

## Education

### **Stony Brook University**

**Aug 2012 - July 2016**

Bachelor of Science – Computer Science
