Programming

Java
JavaScript
PHP
C++
Objective-C
MySQL
Python

Libraries & Frameworks

NodeJS
React
Angular

Operating Systems

Mac OS
Windows
Linux Ubuntu

Foreign Language

Cantonese

Projects

- Summer 2016 **QTI Website Redesign**
 - Redesigned Quarterhorse Technology's website making it viewport responsive and adaptive.
- June 2016 **Handball Scorekeeper Web App**
 - Implemented a web app that helps keep track of handball scores using HTML, CSS, and jQuery.
- Spring 2016 **Digital Conceptions**
 - Worked with a team of 3 to create a website to read and create comics using JSP, JavaScript, Java, and Google App Engine.
- Spring 2016 **Steven Stocks**
 - Collaborated with 2 others to implement a web application designed to simulate a stock trading system using JSP, JavaScript, Java, and MySQL.

Experience

- Summer 2016 **Front End Software Engineer Intern**
Neene Inc
 - Design and implement elegant prototype pages with considerations of user experience.
 - Build pages with HTML, CSS, JavaScript, and the support of the Java backend querying from MySQL database.
- 2015 - 2016 **Library Information Technology Student Worker**
Stony Brook University
 - Synchronized embedded Twitter feed with Totem Ticker JQuery plugin for digital signage.
 - Set up computers for new workers, and troubleshoot computers and networks.
 - Photograph and film library events for recordkeeping and public display.

Education

- 2012 - 2016 **Stony Brook University**
Bachelor of Science – Computer Science
